WORK EXPERIENCE

02/2022 – present

QA Lead
NexxtMission. Freelance. USA/Mexico
Responsibilities:

- Coordinated and directed QA Testing efforts in an Agile sprint-based/kanban-based methodology.
- Collaborated with product managers and developers to define workflow procedures and manage Agile boards as well as process improvements.
- Work with the QA automation team to plan and prioritize automation for various front ends, APIs and services.
- Designed and executed test cases manually using black box and grey box testing techniques for web-based and mobile applications in QA, pre-production, and production environments.
- Trained new testers, both in-house and off-shore, in the QA methodology and the products used by our team and end-user companies.
- Document testing procedures, methodologies, or criteria.
- UI testing with Cypress and APIs testing with Postman.
- Queries to relational databases with SQL language.

QA Manual Tester
Nexxtway. Freelance. Guadalajara, Mexico
Responsibilities:
- Created test cases and performed regular, scheduled testing on all the apps, as well as websites we developed as a company.
- Implementation of QA Methodologies for mobile and web applications.
- Attending and coordinating team meetings, Daily Scrum meetings, Sprint Planning, and Retrospective meetings.
- Proficient in QA testing using tools like JIRA and Monday.com.
- UI testing with Cypress and APIs testing with Postman.
- Write technical documentation and create tasks for developers.

08/2019 – 06/2020

English Language Teacher
Continente Americano University. Guanajuato, Mexico

03/2015 – 06/2019

Archivist and Quality Assurance specialist
CIFO-Veigas Archive. Havana, Cuba

10/2014 – 03/2015

Communications Executive
ACTUAR Artistic Agency for Performing Arts. Havana, Cuba

09/2011 – 10/2014

Information Specialist
Universidad de La Habana. Havana, Cuba

EDUCATION

2006 - 2011

Bachelor's Degree in Librarianship and Information Science, Universidad de La Habana. Havana, Cuba. Thesis: During my studies, I discovered a passion for technology which led me to be involved in a thesis that, along with other tasks and methodologies validation, requires me to design and perform multiple tests on a website. As a result, I detected several bugs and improvements and then worked with the development team to create a better version of that website.
